

## Earth Month Day 25: Revengels

Apr 25th, 2009 by Sydne.

Did you know that you can make t-shirts from plastic bottles? I learned about this mind-boggling concept when I was introduced to Revengels. Their [women's](#), [men's](#) and [kid's](#) tees are created from organic cotton and fiber made from plastic bottles. They use about 3-5 bottles per shirt and the result is soft, sustainable comfort. My favorite is the Women's Earth Day t-shirt (\$32). The screen printed tree and and cool colors fit right in with spring's hippie chic trend. Because what's more chic than going green?

Visit [revengels.com](http://revengels.com) to learn more about the line.
