MILD OBSESSIONS

APRIL ACCESSORIES

1 EVOLV WATER

Staying hydrated this spring and summer is easily elevated with Evolv, the revolutionary combination of natural spring water with the all-natural Archaea Active formula. This colorless and flavorless treasure reaps such health benefits as increased stamina, energy and endurance. The effects of proper hydration and optimal oxygen utilization from a case of 24 bottles promise to kick those caffeinated coffee drinks off any office desk. **\$55 | www.evolvhealth.com**

2 REVENGE IS ... SAVING THE EARTH TEES

If recycling plastic bottles means making new bottles from used ones, then "upcycling" is collecting those bottles and creating ... super silky graphic tees? Using George Herbert's famous quote "living well is the best revenge" as inspiration, the founders of Revenge Is ... define living green while planting seeds of change through social activism. This breakthrough brand aims to make such statements fashionable, like celebrating Earth Day's 40th anniversary on April 22 with a signature shirt. Tees for men and women are made from a 50/50 blend of recycled plastic bottles and organic cotton, printed with non-toxic, soy-based inks and manufactured in the U.S. **\$32 | www.revengeis.com**

3 KRONOS TRAVEL BAGS

Fresh from New York's Accent on Design show and the Grammys' gift bags is the new sustainable travel bag collection, KRONOS. San Diego handbag designer Giacini Atelier produced the chic accessory set with a water-resistant and stain-proof poly-coated fabric, making it perfect for all seasons, sexes and settings. All its raw materials are sourced in the U.S. and are manufactured right here in San Diego. **\$190 to \$230 for handbags and shoulder bags www.giaciniatelier.com**

4 LIVESPEAKR

iPhones can do everything from coordinating cross-country Scrabble games to locating public restrooms in foreign lands. Yet, no application turns those two tiny speakers into an ultra-loud sound system. From the Carlsbad-based company, Digital Group Audio, the Livespeakr is small enough to fit in any clutch and loud enough to disturb the neighbors. Its three-click system cradles iPod devices in both portrait and landscape forms suitable for more than 16 nonstop hours of music, videos and games, thanks to the rechargeable lithium-ion battery. **\$80 | www.livespeakr.com**
